

To Dear Dr. Phil Calwell

Hello Doctor Phill How are you and your family? I am delighted to write you a letter which talking about my information and also my working in PoiPet city. Before I start to tell you my information, I would like to ask you some questions? How is your working and are you still working on project to help the kids in Savong's organization? Firstly, I would like to tell about my job in PoiPet city now I am working as an English teacher in Sovannaphumi School and there are 38 students in my class. I teach primary class moreover; I am being very busying with administrative works. I get only 320\$ for my salary for monthly. It still cheap, however; I am happy to do it because it comes my own knowledge plus my hard-working.

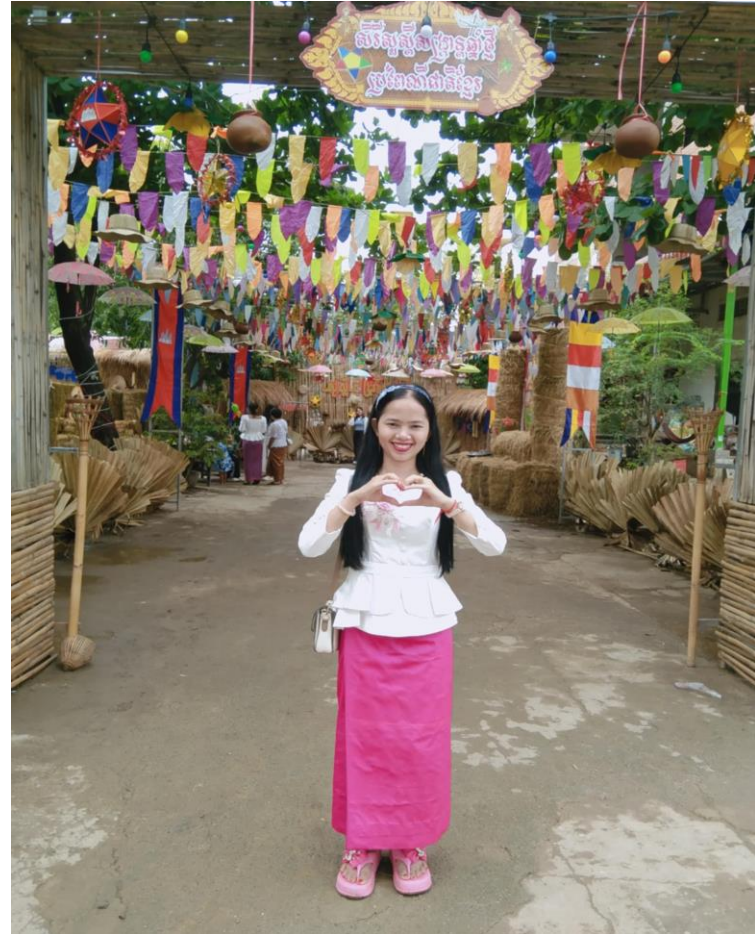

I am feeling great with my teaching because I can transfer my knowledge to my students and they are intelligent students because they can catch the lesson quickly through my

teaching. Besides, teaching the students I could learn many new experiences by using technology because most of documents and administrative works are used by technology one more thing is I could learn from other staffs and also from leaders but sometimes I feel a little stress due to I have too much works of teaching students plus administrative works but it is not a big deal for me because I have encounter many obstacles before so I am used to it.

Now am living with my mom in PoiPet in here there are my people and also there are many jobs especially teaching and casino it is easy to earn money if we have enough knowledge but sometimes I feel that I miss Siem Reap because I used to live in that place so I was familiar with that province but because Covid-19 I had to come to work in Poi Pet and in here I can earn more money because my salary more increase than Siem Reap. Recently I had taught part-time students around 4 to 5 students but now they stopped already due to

their parents don't have enough money. My mom doesn't work anything because she is too old so I work to earn money to support her monthly. I feel very proud of myself because I can help my mom and myself with my own knowledge. In addition, I know a lot of different people through my working and living environment.

Finally, I would love to say that a great deal of thanks for trying to help. your efforts was too much appreciated and I hope that you will keep helping other kids to finish their studying and have a good job as me. You are still the best person in my mind forever. I wish you very best with both with your working and also your family.
